Site 3. Structures land; one structure includes major round surface. Another is rectangular, perhaps even square, is tall + wide. Another is small solid (compact) grey; there are tall vertical extensions, suggesting an AOL of antennas on radio towers, etc.

for BIC

radio antenna

Tall rectangular structure house apparent highly technical research/development activity involving complex electronic equipment & perhaps involving ~~or~~ bio-electronic experiments of some sort with people not there voluntarily.

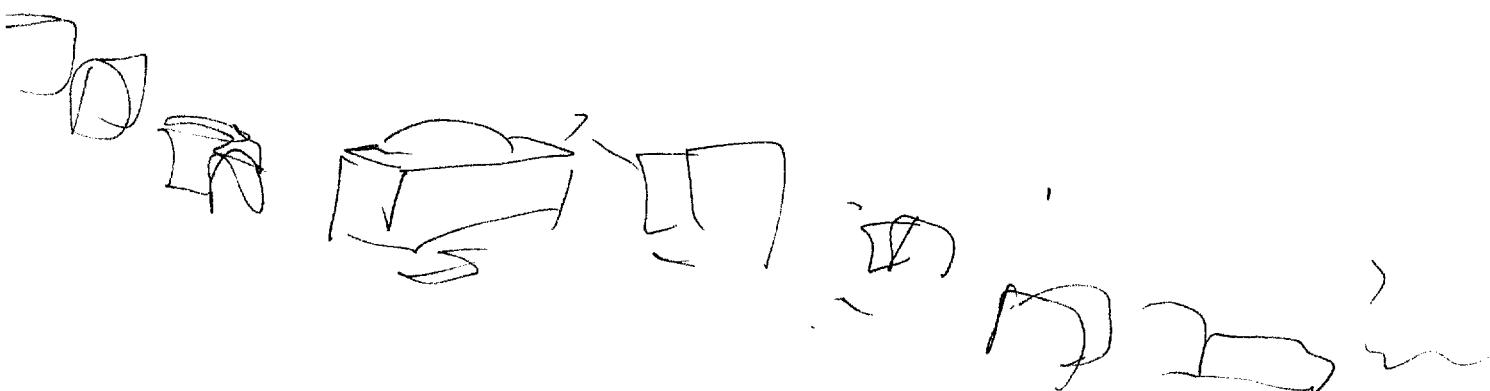

inside top 2 floors, something  
should be perceptible.
